Newark, CA - September 3, 2008 – Payment Processing, Inc. (PPI), the industry leader for integrated payment solutions, has been named to the Inc. 5000, a ranking of the nation's fastest growing privately held companies. Fueled by a 143.7% increase in revenues from 2003 to 2007, PPI was ranked number 2,550 in the Inc. 5000.

“Our second annual Inc. 5000 continues the most ambitious project in business journalism,” said Inc. 5000 Project Manager, Jim Melloan. “The Inc. 5000 gives an unrivalled portrait of young, underreported companies across all industries doing fascinating things with cutting-edge business models, as well as older companies that are still showing impressive growth.”

“PPI's solid business model, our cutting-edge technology and our top-notch people have helped software developers in nearly every industry realize the advantages of integrated payment processing,” said Chuck Smith, CEO of PPI. “As demand for electronic payments soars and developers seek payment solutions that add real value to their products, our partnerships continue to grow. This recognition as one of the nation's fastest growing companies is confirmation that we're doing it right.”

PPI provides software developers with a full range of services for integrating electronic credit and debit card payments, including gateway services, integration support, merchant support and services, and PABP/PCI security assistance. The company's proprietary PPI PayMover platform can be integrated with virtually any business application.
