

FOR IMMEDIATE RELEASE

**Sydasoft Medical Practice Management Software
Chooses Payment Solution from Payment Processing, Inc.**

Partnership enables its medical practice management software application to offer doctors a faster and more accurate payment solution for patient payments

Irvine, CA, March 21, 2008 – Sydasoft, Inc. announces a partnership with Payment Processing, Inc. (PPI), an industry leader for integrated payment solutions. PPI's solution is now integrated with Sydasoft's SydaMED Practice Management Software to help doctors and other medical providers process patient credit and debit card payments quickly and cost effectively.

“Sydasoft has always aimed to be on the leading edge of improving and facilitating practice management for doctors,” states Kyle Farhat, founder and CEO of Sydasoft. “Our decision to partner with PPI allows us to take our already advanced patient receivables module and make it even more efficient for doctors and healthcare providers who can often process hundreds of patient payments daily. The PPI integration posts patients payments directly into the patient's account, thereby eliminating the chore of doing multiple keyboardings for the same payment.”

PPI's comprehensive solution provides an integrated payment transaction any time the medical office processes credit or debit transactions from their patients:

- Feature-rich, fast and dependable payment technology with transaction processing that is seamless, secure, and reliable
- Auto-posting of transactions directly into the patient's account
- Better-than-Bank merchant account services
- Free, unlimited 24/7/365 technical and administrative support for all transaction processing issues

“PPI is clearly an excellent solution for the medical sector, and we are very pleased to have Sydasoft spearheading our advancement into this market,” says Chuck Riegel, executive vice president, software products and partnerships at PPI. “A medical application developer like Sydasoft is in the best position to leverage the distinct marketplace advantages that are inherent with a PPI partnership as they provide their customers with a great payment solution that ultimately benefits their medical practices and their patients.”

About Sydasoft, Inc.

Sydasoft, Inc. is the developer of the advanced medical practice management software, SydaMED for medical offices with 1 to 100 doctors. SydaMED has a modern, attractive, and easy-to-learn interface that makes patient record-keeping, scheduling, insurance

billing and patient accounting easy and accurate. SydaMED can be used in any type of medical office or clinic with any specialty. Sydasoft was established in 2002 as an Irvine, California-based company. For more information, visit www.sydasoft.com

About Payment Processing, Inc.

Since 1995, PPI has led the industry in providing software developers with a full range of services for developing and promoting integrated payment solutions, including PPI developed payment gateway technology, integration support, merchant support, marketing assistance and PADSS/PCI security services. Today, PPI is the most successful company in the world focused on integrated payment solutions, supporting nearly 700 active partners and more than 26,000 merchants with efficient, cost-effective payment solutions.
