

AIMsi Delivers Encrypted Swipe Security To Retailers

Secure Payment Processing Solution delivered through partnership with PPI

Dubuque, IA – May 25, 2010 – Tri-Technical Systems, Inc., a leading developer of retail point-of-sale software, announces the integration of Point-2-Point Security from Payment Processing, Inc. with AIMsi point-of-sale software. To date, the PA-DSS validated solution with encrypted swipe has been deployed to 24 retail customers.

To ensure the merchant's POS system never handles clear text cardholder data, the solution integrates seamlessly with the PPI PayMover hosted payment service and utilizes Magtek's MagnaSafe technology using open standards technology to encrypt credit card track data within the reader. Encrypted track data is decrypted upon reaching PPI PayMover, which communicates with the processor in a secure manner and returns the transaction status to the POS.

“Ensuring that our customers mitigate their risk for a data breach is key,” commented Paul Acton, President of Tri-Technical Systems. “Our partnership with Payment Processing, Inc. enables us to provide secure and reliable payment processing solutions that integrate seamlessly with our point of sale software.”

Compliant with the global security standard created by the Payment Card Industry Security Standards Council, AIMsi V9 is a validated Payment Data Security Standard (PA-DSS) application. AIMsi is a comprehensive retail point of sale software that not only performs basic functions like tracking inventory, managing customers and processing sales but also can be customized to meet the unique needs of business through add-on modules including Repair & Service tracking, Lesson Scheduling, Short Term Rentals, Rent and Sales Contracts, Contact Management, Emailing capabilities and a Time Scheduler.

“Partners like Tri-Technical Systems are actively deploying secure payment processing solutions that go beyond the basic requirements of PCI Compliance” stated Chuck Riegel, PPI's Executive Vice President. “Their ability to successfully implement encrypted swipe solutions validates that next-generation payment security is now readily available.”

About Tri-Technical Systems Inc.

Since its foundation in 1984, Tri-Technical Systems has become an industry leader in providing POS and business software solutions to retailers. Today, over 4,000 retailers across the United States and Canada are growing their businesses with greater efficiency and more profitably with the help of Tri-Tech's product suite.

About Payment Processing, Inc.

Since 1995, PPI has been partnering with software developers and their customers, delivering nothing less than robust, stable, fully supported and profitable integrated payment solutions. In 2009, PPI processed in excess of \$5.5 billion in Visa® and MasterCard® payments. We provide developers with a full range of in-house services for building and promoting integrated payment solutions, including PPI-developed hosted payment services, integration support, customer support, marketing assistance and PA-DSS/PCI DSS

security services. It's why more than 1,300 partners and nearly 40,000 businesses have selected Payment Processing, Inc. as their dedicated payment professionals. Learn more at www.paypros.com.
